**RE: Acid Rain Within 50-Mile Radius of 370 Elmira Road, Ithaca, NY
14850**

Dear Ms. Calderon:

Thank you for taking the time to speak with me today. As we discussed, I am interested in obtaining complaints, studies, or records about significant potential human causes of acid rain for the period between January 1, 2014 and June 1, 2014 within a fifty (50) mile radius of 370 Elmira Road, Ithaca, NY 14850. I am particularly interested in any complaints filed against anyone in that geographic area during that time period concerning acid rain or other pollution. I would also like to obtain information about the activity of the power plant located at 228 Cayuga Drive, Lansing, NY 14882 and if there were any days or periods during which combustion of fossil fuels was significantly greater than average during April of 2014 or May of 2014.

If you anticipate substantial costs associated with obtaining these records, please contact me prior to sending. Thank you for your attention to this matter.

Very truly yours,

WHITE AND WILLIAMS LLP

A handwritten signature in black ink that reads 'Joseph D. Mirarchi'.
